

Issue Layout

The moto of CRAFT is Practical Hope so in a general sense this issue is very much orientated around such hope: And in particular in this Issue the 80+ exhibits are arranged thus:

Section 1 Introduction

Section 2: Issue Overview- esp. broader issues and overlaps between the Bush Mechanic/Artificer and other knowledges esp. hand knowledges and those of practical hope

Section 3: Background Source Exhibits - esp. eBooks 1, 2 & 3. These are on 1 the actual Action Research on the Bush Mechanic undertaken in the decade from 2001, 2 using this research to refocus the education and training systems, and 3 wrapping these together in an Archaic Renaissance where the old is mixed with the even older in order to renew our culture along the lines of practical hope and knowledge

Section 4: Supplementary Exhibits – esp. depth issues involving the Bush Mechanic/Artificer

Section 5: Artificer Support Exhibits – esp. exhibits that supplement and explain aspects of the Artificer/Bush Mechanic proper

Section 6: Artificer Related Areas – esp. areas associated with and overlapping, the Artificer inc. emerging areas of Hackers, Survivalists, Preppers etc.

Section 7: Artificer Publications

As there are a large number of articles that I have authored over the past 15years of this Action Research Program I have had to make a selection therefrom and thus this list is the result. Broadly speaking I have included in this Issue those exhibits/articles that relate to the practical here and now lived life of the Bush Mechanic/Artificer and have not included the more esoteric/spiritual ones.
