

Green Design

I recommend GD sites oriented to Intentional and Sustainable Communities (ISC). An example of this could be genuine Eco-villages (most EV's in Australia are suburban escapes for wealthy upper class folks with houses valued at over \$0.5m), many Indigenous Wisdom communities, and of course IC's themselves. Other approaches include co-housing, kibbutz, and permaculture. Other arenas include Hackers groups, Men's Sheds, Women's collectives, Wilders and so forth.

Yet we need a rubric to collect all these and to help identify and protect the underlying principles and patterns. This is what CRAFT seeks to do – do join all the CRAFT dots, in a form of Crafy Green Design.

It is to this last task that CRAFT has been directed during our four years of publishing our eZine. Please spread the word and help re-integrated CRAFT and craft in our day to day lives.

For instance please consider a websites such as:
