

Maieutic Business Planning

Maieutic helped me realise that my dream/idea had value that it could actually happen... I saw the ideas move from my mind to scribbled notes to timelines and strategy and vision and mission and goals. I know that Maieutic will be a consistent presence in my journey to fully materialize my dream, helping me engage in networks and connections that will move my organization forward, pushing me to keep coming back to my mission and goals and not lose sight of it all in the chaos of building an organization from the ground up.
